

# WHAT CAN VIDEOCONFERENCING DO FOR YOU?

- attend an interview
- support literacy
- virtual author visit
- save travel time
- share stories
- meet with family
- talk to an astronaut
- career development
- have fun
- enhance library's value of service to the community
- increase profile of library in the community
- connect to community groups and other organizations

## CONNECTING LIBRARIES

learn ... communicate ... explore

Communicate with healthcare professionals, participate in distance education, attend meetings, learn new skills and more—all by videoconference from your local library.

Speak to library staff to find out how to participate in library-based programs or use the equipment for yourself or your organization.

## CONNECTING PEOPLE

What if there was a place where you could meet with your doctor, learn from an astronaut and have an expert answer your farming questions?

For residents of Alberta, that place is their local library. Residents can engage and interact with live experts, medical professionals, colleagues and more, all within minutes of home. The RISE Network links ninety-three libraries, six library system headquarters as well as one provincial library consortia via a sophisticated, secure videoconference network.

August 2014

**CONNECTING LIBRARIES, CONNECTING PEOPLE**

**RISE Network: making an impact, one connection at a time,  
through a province-wide videoconference network.**

[www.risenetwork.ca](http://www.risenetwork.ca)

The RISE Network differs from online video calling services by providing a secure network, high definition quality and by allowing groups of people to collaborate from multiple locations at once.

Speak to local library staff to see if the RISE Network can save your organization time and money.
